ADD VIDEO MONITORING TO YOUR WORKSITE

Work site monitoring of daily operations is becoming increasingly more important with changes in safety regulations. Securing assets with video surveillance also greatly reduces the threat of theft and vandalism. As a stand-alone or integrated into an existing video system, **SCOUT** combines power, communications and video processing in a reliable, easy-to-use system. Create the safest possible environment for your remote site personnel and equipment.

FEATURES

- Portable with quick set-up
- Runs on the LTE network (other internet options available if required)
- Multiple cameras and mounting options
- Stand alone or integrate with existing infrastructure
- Local network and remote viewing

APPLICATIONS

- Temporary site monitoring
- Standard video surveillance
- Training or safety programs

BASE SYSTEM

- Desktop monitoring station
- Local area network
- Three cameras (camera quantity and other upgrades are available)
